

Appendix 11: Segment Benefit Scores

BENEFIT FACTORS FOR MAINTAINING ROAD SEGMENTS				Transportation System				Public Access				Special Uses	Administrative Uses			Forest Management and Products (cumulative)	TOTALS
				TS1	TS2	TS3	TS4	PA1	PA2	PA3	PA4	SU1	AU1	AU2		FMP1	
				Connectivity to Public roads or communities	Connectivity to another road cluster or a neighboring 6th field subwatershed	Provides recurring administrative access needs to an area	Road value for access to other ownership land	Public access to developed or potential developed recreation sites	Public access to traditional, regularly used dispersed recreation sites (forest camps)	Provide access to a water source	Access for small forest products and/or hunting and fishing opportunities	Provides access for Range Management activities	Provides important suppression or control access as part of a fire management strategy	Provides access to future fuels projects and areas of high fire and fuel loads	Suitable access to siculturally manipulate forest vegetation for forest products, restoration, or other management objectives		
	Segment #	FS Road #	Segment Length (miles)	Weighting Factors (multipliers applied to normalized data to establish relative significance among factors)													
				3.0	2.0	1.0	2.0	4.0	2.0	2.0	1.0	3.0	3.0	2.0	2.0		
				Normalizing Coefficients (multipliers applied to segment data to bring all data into same range of 0 to 1, before weighting)													
				1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00
